

Data Structures and Algorithms - Assignment 2

1. Write a recursive method to find nth term of fibonacci series. (Draw recursion tree)
2. Find GCD of two given numbers using recursion.
3. Leetcode Problem : <https://leetcode.com/problems/reverse-linked-list/description>
4. Leetcode Problem : <https://leetcode.com/problems/reverse-linked-list-ii/description>

Optional

5. Solve Tower of Hanoi problem using recursion.
6. Implement menu driven program to maintain linked list of employees and provide below operations.
 - Add employee (Perform any add operation)
 - Display all employees
 - Search employee by name
 - Delete employee by empid
 - Update salary of employee
