

SQL Injection

```
const email = 'anil@gmail.com'
```

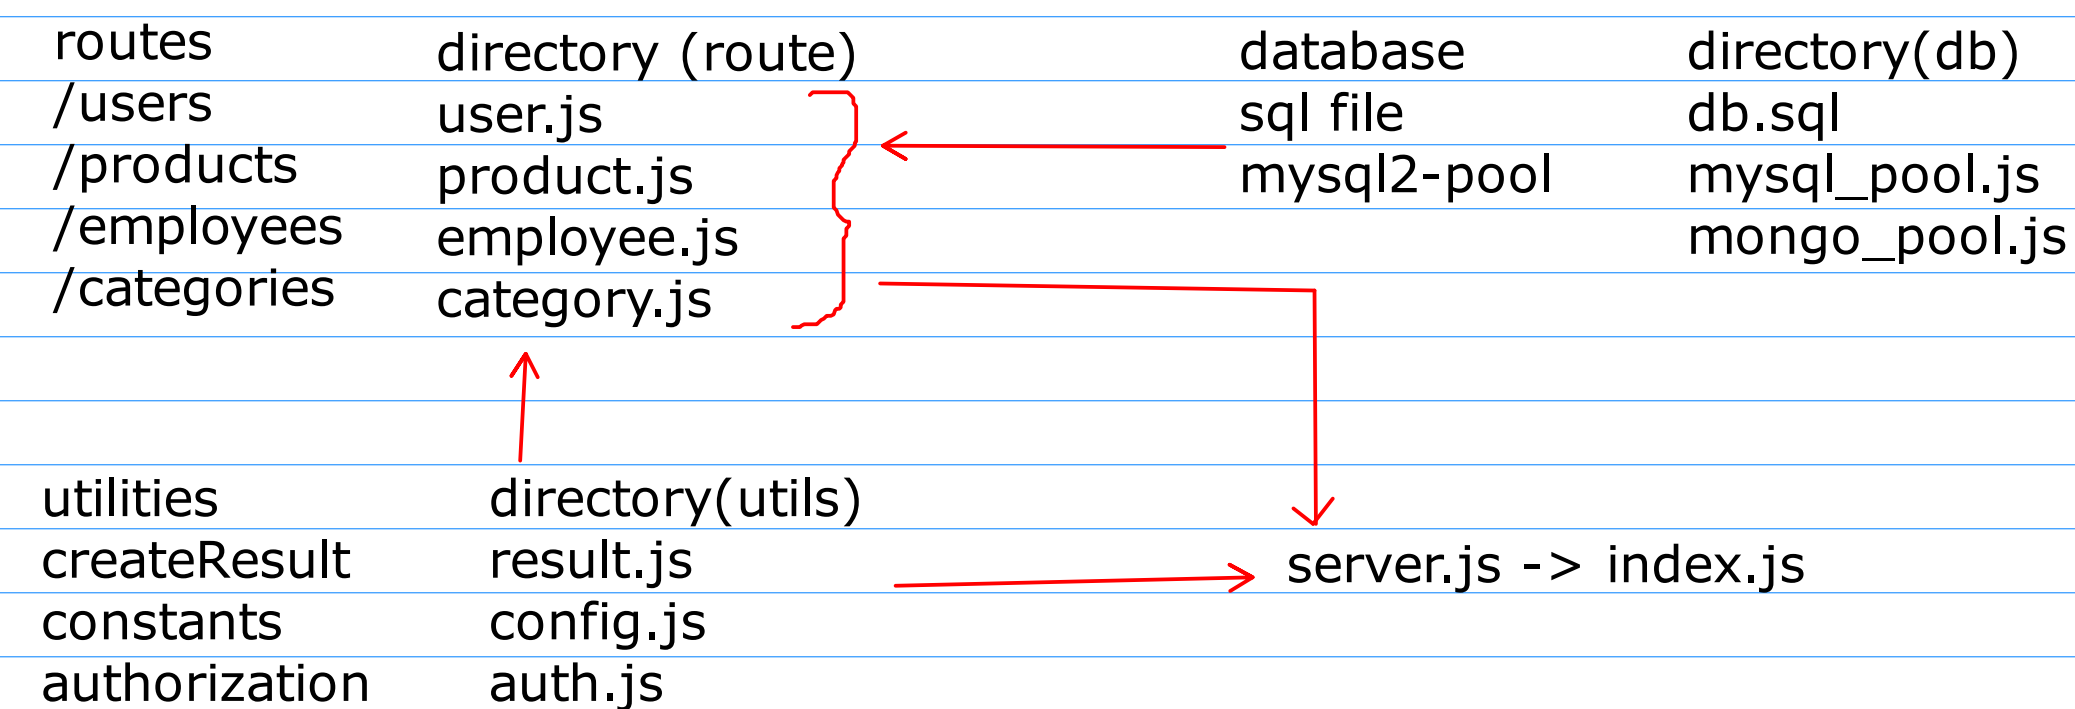

```
const password = "anil' OR 1' "
```

```
const sql = `SELECT * FROM users WHERE email = ${email} and password=${password}`
```

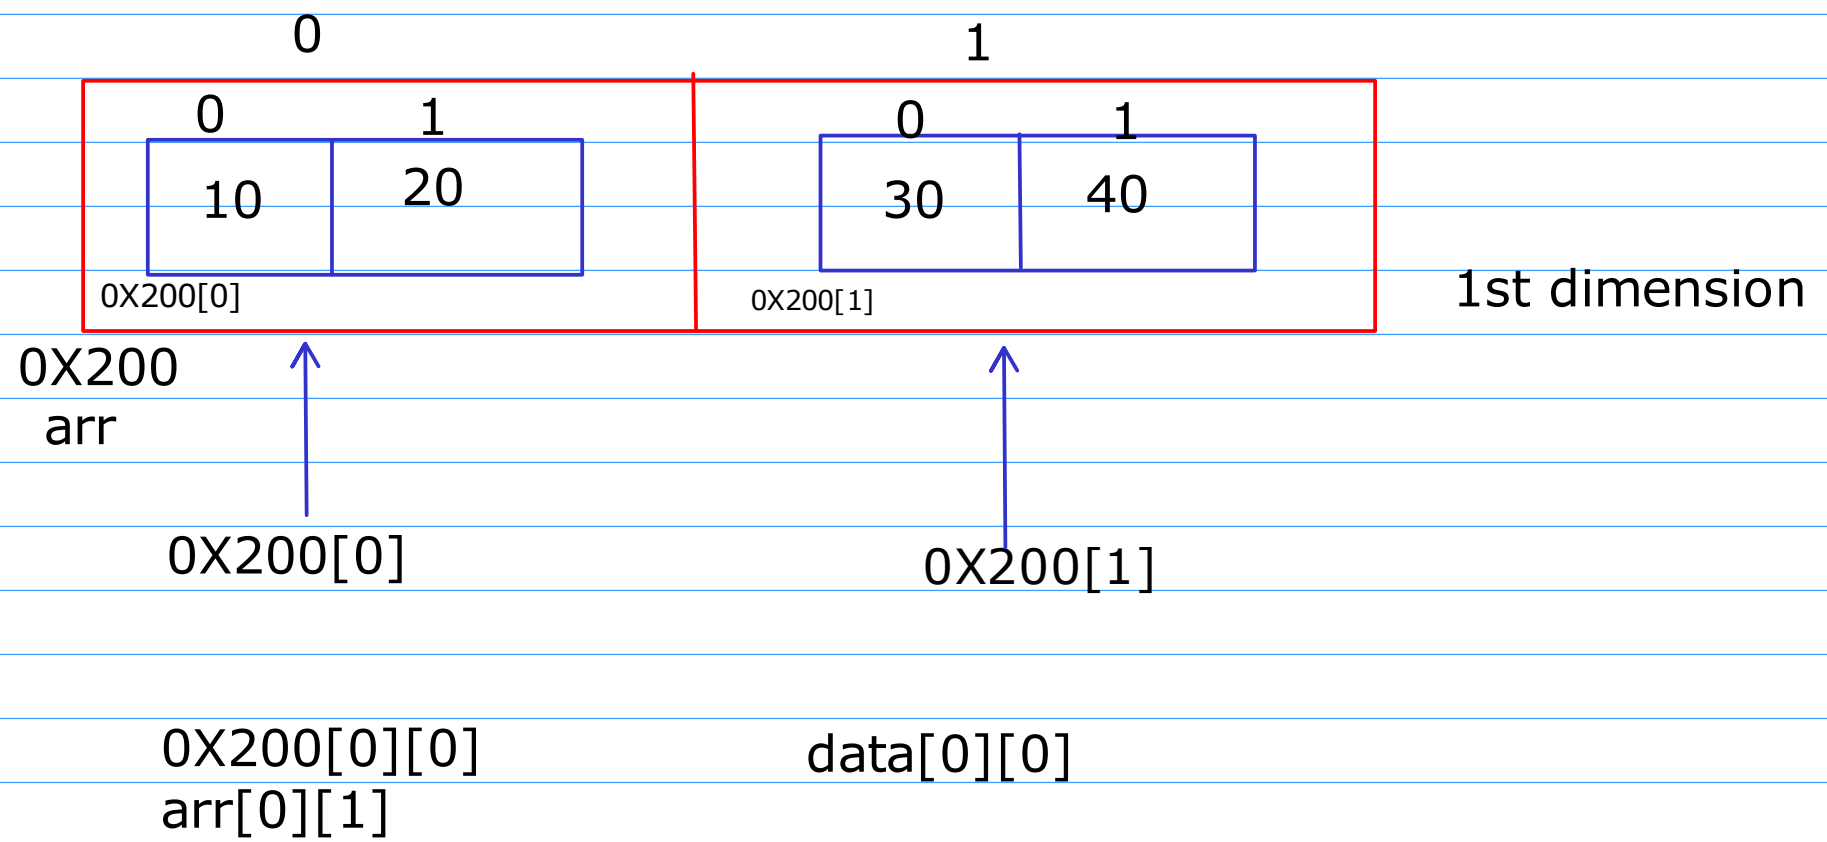

```
SELECT * FROM users WHERE email = 'anil@gmail.com' and password='anil' OR 1
```

```
const sql = `SELECT * FROM users WHERE email = ? and password=?`
```

```
SELECT * FROM users WHERE email = 'anil@gmail.com' and password='anil OR 1';
```

1st 2nd
int arr[2][2]

email = "mukesh@gmail.com"

password = "mukesh' OR '1"

`SELECT \* FROM users WHERE email = 'mukesh@gmail.com' AND password = 'mukesh' OR '1'`

1. Json web token (JWT)
2. Authorization
3. Multer
4. Create an entire backend for online food application

LabWork

1. Implement the 4.Server
2. Look for middleware
3. Solve the self leraning of express
